

**Appln No. 10/632,347
Supplemental Amendment**

REMARKS/ARGUMENTS

Summary of Interview

Applicants wish to thank Examiner Jackson for extending the courtesy of a telephone interview on April 14, 2006. During the interview U.S. Patent 6,122,537 to Schmidt and claim 1 were discussed. Applicants emphasized that the invention of claim 1 does not use doppler radar detection, rather the invention of claim 1 detects changes in complex impedance driven by changes in the electrical activity of a subject's heart. Applicants also emphasized that detecting changes in complex impedance enables the detection of an electrocardiogram.

Amendments

Claims 1, 7 and 9 have been amended to clarify that the changes in complex impedance detected are "variations in the complex impedance with respect to the electrical activity of the subject's heart".

Conclusion

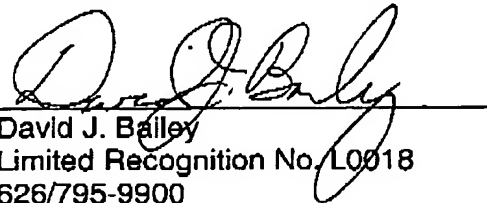

In view of the foregoing amendment and response, it is believed that the application is in condition for allowance. Therefore, Applicants request the prompt issuance of a Notice of Allowability.

If any questions remain regarding the allowability of the application, Applicants request that the Examiner contact the undersigned at the number listed below.

The Commissioner is hereby authorized to charge any fees under 37 CFR 1.16 and 1.17 which may be required by this paper to Deposit Account No. 03-1728. Please show our docket number with any charge or credit to our Deposit Account.

Respectfully submitted,

CHRISTIE, PARKER & HALE, LLP
